

## Topic Exploration Report

Topic explorations are designed to provide a high-level briefing on new topics submitted for consideration by Health Technology Wales. The main objectives of this report are to:

1. Determine the quantity and quality of evidence available for a technology of interest.
2. Identify any gaps in the evidence/ongoing evidence collection.
3. Inform decisions on topics that warrant fuller assessment by Health Technology Wales.

<b>Topic:</b>	<b>NTP097 CATCH (Common Approach To Children's Health)</b>
<b>Topic exploration report number:</b>	<b>TER056</b>

### Introduction and aims

On behalf of Health Technology Wales, Cedar researchers searched for clinical and health economic evidence on the use of CATCH app by parents and carers of children from conception through pregnancy, birth and up to age of 5.

### Summary of findings

No published evidence exists on the use of the CATCH app for parents and carers of children from conception through pregnancy, birth and up to age of 5.

### Areas of uncertainty

No published clinical evidence, health economic evidence nor ongoing studies were identified.

### Conclusions

Due to the lack of published clinical and health economic evidence, HTW's Assessment Group concluded not to progress this topic further at this stage.
